

## Hadera Links from Zagada Labs

A key part of Zagada Labs execution strategy is to optimize our relationship with The 15 - member CARICOM Block (<https://caricom.org/>) countries for rapid adoption of our SEAT adoption strategy. Working with the CARICOM Development Fund ( a US\$130M Fund)-12 of the member states have been selected to pilot our regional launch.

Additionally, the CARICOM Block has forged a deep relationship with the Afreximbank to the tune of US\$3 Billion thus far. The bank, having established a regional headquarters in Barbados, is deepening investments across the region and cementing a path to expand trade, investment, and cultural relationship between the Caribbean and African 52 member states of the bank. Zagada Labs has established a relation with CARICOM and Afreximbank to initially get the PEV Protocol's SEAT adoption in 10 African states. This strategy represents a strategic adoption model through this relationship to begin its Global South adoption strategy:

Afreximbank has made significant investments in the Caribbean—CARICOM region under its Partnership Agreement with CARICOM member states:

Funding for Economic Sectors: The bank approved \$1.5 billion in financing, later increased to \$3 billion, to support critical sectors such as tourism, healthcare, renewable energy, agriculture, shipping, mining, and aquaculture. Financing opportunity for Guyanese companies with Roadshow:

Anguillan .AI TLD website domain business

Anguilla .AI TLD generated US\$50Million for the government in 2024 and is projected to exceed US\$100M in 2025. Zagada Labs has been paid US\$15K to use its protocol to execute a SEAT Valuation for the country as well as use its PEV 4AC Engine to model the valuation of its .AI TLD asset as a company for tokenization and launch. AI companies and individuals registering a .AI domain has to purchase a subscription from the Anguillan government. It represents 20% of the government's GDP.
